

ISLAND LAKE RES. RELEASE IN 2004

Date	Island lake	Interstate canal
6-9-05	EST 35cfs	31.5cfs
6-10-05	EST 35cfs	31.5cfs
6-11-05	EST 35cfs	31.5cfs
6-12-05	EST 35cfs	31.5cfs
6-13-05	EST 35cfs	31.5cfs
6-14-05	EST 35cfs	31.5cfs
6-15-05	EST 0cfs	

Total acre ft released 415.8 Total acre ft delivered 374.22

Note that interstate canal at the same time left a small flow of water out of beaver meadow res at 10.0 cfs that was released and delivered minus a 10% shrink.

Also of note on 6-9-04-6-11-04 the creek and the flow into the interstate stayed at the same level.

On 6-12-04 the creek level dropped off from a 1902 level to a 1895 priority. I allowed the interstate canal to still take a 31.5 cfs flow until 6-15-04 which during this time probably was creek water.

We rode in on the 9th of June to turn the water out of Island Lake. This is the earliest possible time to get into Island Lake and the trail into the lake had not been cleared by the forest service.

We rode back into Island lake on the 15th of June and called the res empty.
